Focused Products & Services

End to End System Integration

- ◆ Blade center and rack server hardware integration, Workstations / Virtualization
- ◆ Power conditioning
- ◆ Project Management
- ◆ Cloud Solution / Services
- ◆ Structured cabling, LAN and WAN Integration
- ◆ Entire range of Desktop, Laptop, LFD TV Video Wall and Peripheral installation
- ◆ OS, Antivirus and Network support

IT Infrastructure Management Services

- ◆ Server Administration – Infrastructure Management.
- ◆ Complete outsourcing (AMC / FMS)
- ◆ LENOVO ASP Services.

Our Core Services

Data Centre

Data Center has acres of data storage space available within for which we and can work closely with your team to configure a Data Center Suite based on your specific business requirements.

- ◆ Our ISP private & fully enclosed data center suites can accommodate a wide array of IT equipment and collocation cabinets.
- ◆ Data Center facilities are designed, built and operated to provide reliability to your Mission Critical Data & Applications. Our 100% Uptime SLA covers key infrastructure elements and service level objectives including Data center Power, Temperature, Humidity & Access control.
- ◆ Access to your private Data Center Suite is controlled by 24x7 On-Site by Security staff, Mantraps, Biometric screening and Closed Circuit TV (CCTV) Surveillance. Additionally, your Data Center Suite can also be configured with its own dedicated Access control system.

Enterprise Servers & Virtualized Storage

We offer a full range of Enterprise Server & Storage solution, from industry-leading storage OEM's like IBM, LENOVO, HP, DELL, CISCO etc.

Storage Suite services include...

- ◆ x86 & Risc (Reduced instruction set computing) based Server
- ◆ Nearline & Online Storage with High availability of Application
- ◆ Server Consolidation with Virtualization & Backup Solution.

Blade Server

Our unique innovation helps solve biggest challenges.

Blade Systems enclosure has the best IT Hardware stuff built in for large infrastructure management. We combine best technology from across the Globe to make Blade System be very easy to use & be useful to you as well. It's been considered that you get the most powerful performance & innovations regardless of whichever blade enclosure you choose.

- ◆ Thermal Logic technologies: Smart Technology saves your energy every second by releasing load of your air conditioners saving 30 per cent of power consumption.
- ◆ Virtual Connect architecture: Wire once and then add, replace or recover blades on the fly without impacting networks and storage or creating any extra activity.
- ◆ Insight Control management: Simple, single package provides all the tools to streamline operations and increase administrator productivity up to tenfold.

RISC Based Server for Mission Critical Application & SAP HANA

UNIX is mission-critical. It can be a business tool, a manufacturing equipment or a utility management platform. We enable customers to do more with less working to narrow the gap between business demands and IT ability to deliver.

Power Systems is the first platform to provide a supported environment for virtualized instances of SAP HANA in production, enabling SAP customers to run multiple HANA instances on the same system without the restrictions of VMware and with the added benefit of an unprecedented 80% system utilization guarantee for enterprise class systems. We in association with these OEM's are dedicatedly focused on catering such increasing demands on SAP & delivering best expertise designing DR Solution. An IT Infra Solution Provider

High Availability Clustering

To achieve near-zero downtime, mission-critical systems cannot afford to have single points of failure in servers, storage or interconnects. High-availability (HA) is now a necessity in most modern IT systems. HA is most effectively achieved in server and storage systems through server clustering, which allows systems to survive hardware or software failures without users experiencing downtime.

Om Sai Corporation specializes in designing, deploying and supporting clustered HA systems for a variety of applications and environments.

Network Integration & Security Solution

In today's Internet world, every company's Data is critical and threats are increasing day by day in different formats. To secure downtime in your organization, IT Infrastructure needs extensive focus on security solutions. To deploy the solutions we at Om Sai Corporation provide Internet security Solutions with our core competency & expertise on maximum products available.

Gateway Level Security

Gateway level Security functions such as Antivirus, Anti-spyware, Content Filtering and Intrusion Detection/Prevention either integrated into the gateway or positioned as add on appliances.

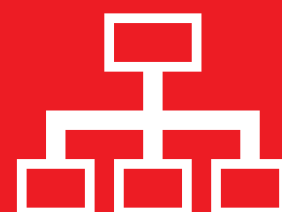

We provide the same by having partnership with all leading vendors of this area namely Fortinet, Cisco, Juniper, Check Point, Cyberoam, Sonicwall etc.

Mailing Security

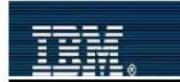

Email communication is known as the backbone of all business on which threats are increasing day by day and changing different forms.

We provide Email security to protect mail servers from threats like Spam, Virus, Trojans, and Phishing...

We have our partnership with all Major Esteemed brands like Cisco Ironport, McAfee, Symantec, Barracuda etc. for the same.
